

LIVE Twitter poster conference

Our first Twitter poster conference will be held over 24 hours from 15-16 July 2020. #IOPPposter is a free event where researchers can present their posters in a virtual capacity.

Participants can [register here](#) and posters will be judged in a variety of subject categories by leading international experts from the board of [IOP SciNotes](#), and other IOP Publishing journal boards. Winning posters will receive £100 and an IOP ebook of their choice.

[Find out more and register here.](#)

Help your researchers become impactful scientists

In this [recorded webinar](#) Dr Sam Illingworth, author of *[Effective Science Communications \(Second Edition\): A practical guide to surviving as a scientist](#)*, guides you through his latest book exploring some of the key topics:

- publishing work in academic journals
- applying for funding
- improving presentation skills
- outreach and public engagement
- engaging with the mass media
- establishing an online presence
- science and policy

Podcasts from Physics World

Listen to three medical physicists from [The Christie](#) – the largest cancer hospital in Europe – talk about their careers in this podcast; [Working in medical physics: not your average career](#)

Find out how physicists at one Canadian university responded to COVID-19 restrictions on in-person learning with this podcast; [Mailing undergraduate lab experiments to students stuck at home, how to run a physics conference on Zoom.](#)

Explore the full [audio archives here](#).

Still time to register for our virtual conference: Quantum 2020

In October Quantum 2020 will bring together the international quantum community to learn, share and collaborate on the latest

research and emerging areas of high interest. The virtual event is organized by the Institute of Physics and IOP Publishing, in partnership with the University of Science and Technology of China (USTC).
